To Whom it May Concern,

On behalf of the Bear River Water Conservancy District (BRWCD), I want to thank all of you for your time and interest in submitting a bid for our Flat Canyon Test Well in Deweyville, UT. Some of the most competent and qualified well drillers in the state expressed interest in this project. The BRWCD relies on a public bid process that specifies that the qualified bidder submitting the lowest bid will be awarded the contract.

Based on the bids received, it is the intent of the Bear River Water Conservancy District to award the job of drilling the test well to Lang Equipment of Salt Lake City.

Bid consideration was based on the Schedule A portion of the bids as shown on the attached table.

Regards,

Carl W. Mackley, P.E.
