EPA req	uires monitoring of over 80 dri	nking water	contaminants.	Those contamin	ants liste	d in the table above are the only	y contami	nants detected in your drinking water.

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbial contaminants are available from: Safe Drinking Water Hotline: (800) 426-4791	inking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The esence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and p ealth effects can be obtained by calling the EPA's Safe Drinking Water Hotline: (800) 426-4791.	otential
